We wish to inform our readers that concerns have been raised regarding the integrity of the data presented in the above-mentioned paper, specifically the duplication of images in Figures 1 and 2, which appear identical despite representing different materials. The issue has been flagged as a potential data integrity problem, and we are currently investigating the matter in collaboration with the authors.

At this stage, the investigation is ongoing, and we are awaiting clarification from the authors regarding the accuracy of the figures and the validity of the reported results. As part of our commitment to transparency and ensuring the highest standards of scholarly conduct, we will update our readers on the outcome of the investigation once it is concluded.

In the meantime, we advise readers to interpret the findings of the paper with caution. Should the investigation reveal any issues with the data, appropriate corrective actions, including a corrigendum or retraction, will be considered.
